Distribution Card System

NYRA
Your Partner in Solution

In late 1997 the first distribution card system was launched by Bank Lippo (now CIMB Niaga), Wicaksana Overseas International, and Visa International.

The system is able to help manufacturers in solving a complex payment collection within the distribution channels. We have been awarded by this consortium develop a complete system to cater each parties requirements moving towards cashless and paperless transactions.

The need for such system regardless of the industry have given us the interest to operate such system by offering outsourcing services to manufacturers working hand in hand with a reputable bank.
